About Me

Full Stack Developer with hands-on experience building and deploying real-world web applications. Skilled in developing scalable admin panels, SEO-optimized platforms, and performance-focused systems using modern technologies like Next.js, Node.js, and PostgreSQL.

Work Experience

Full Stack Developer (Freelance & Client Projects)

ByteSolve Solutions

2024 - Present

Developed and deployed production-grade web applications for real clients, focusing on scalability and real-world usability. Built dynamic admin panels with role-based access and efficient data management systems.

Designed high-performance, SEO-optimized websites achieving 90+ Lighthouse scores, ensuring fast load times and excellent user experience. Implemented robust backend architectures using Node.js, Express, and PostgreSQL.

Integrated background job processing with BullMQ to handle asynchronous tasks efficiently, and managed complete deployment workflows using Docker and VPS environments.

Where I am best fit ?

SEO + High-Performance Websites

I build fast, SEO-optimized websites that rank higher and load instantly. Focused on performance, clean architecture, and real business growth.

Admin Panels + Business Systems

I develop scalable admin panels and internal tools to streamline business operations. From dashboards to automation, I build systems that save time and increase efficiency.
